U.S. Patent and Trademark Office PTOL-37 (Rev. 7-05)

**Notice of Allowability** 

Part of Paper No./Mail Date 24102005

Application/Control Number: 10/632,148

Art Unit: 1624

## Response to Amendment

As requested in the correspondence from applicants, filed 30 September 2005 (hereinafter "present amendment"), which is in reply to the Office action mailed 13 September 2005 (hereinafter "previous Office action"), claims 1 and 8 have been amended.

## Status of Claim Rejections - 35 USC § 103

In the previous Office action, claims 1, 2, 4-7 and 9 were rejected under 35 U.S.C. 103(a) as being unpatentable over Us 5,453,516 (Fischer) in view of Smith and Linnhoff, *Chemical Engineering, Research and Design*, vol. 66, pages 195-228 (May 1988).

In view of the present amendment to the independent claims, 1 and 8, which now requires the process to be a process for the <u>N</u>-methylation of nitrogenous heterocycles having at least one nitrogen atom bonded to a hydrogen atom, the rejection based on Fisher in view of Smith and Linnhoff is hereby withdrawn.

## Allowable Subject Matter

Claims 1-9 are allowed.

Reasons for indication of allowable subject matter were provided in the Office action mailed 8 February 2005. All rejections which have been set forth in the prosecution of the instant application have been withdrawn.

In addition to the pertinent prior art cited thus far in previous Office actions, the examiner wishes to bring to applicants' attention US 6,326,501 (Jiang), which discloses a process for N-methylating indole compounds with dimethyl carbonate, in a batchwise

Art Unit: 1624

manner. No suggestion to continuously remove methanol produced during the reaction is found in Jiang, nor is there any suggestion to make the process continuous in the Jiang patent. Furthermore, the manner in which the examples demonstrate the process being carried out essentially teaches away from continuous removal of methanol. The reaction as demonstrated in the examples of Jiang are conducted under reflux, which recirculates all of the substances leaving as vapor from the heated reaction mixture, including the methanol produced by the reaction of dimethyl carbonate with the starting material. The teaching in Jiang that the reaction should be conducted under reflux teaches away from the limitation in the instant claims, "while continuously removing the methanol produced during the reaction."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

All Post-Allowance Correspondence concerning this application must be mailed to:

Mail Stop Issue Fee Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Or you can fax them to the Office of Patent Publications at 703-872-9306, in order to expedite the handling of such correspondence as amendments under 37 CFR 1.312; information disclosure statements, and formal drawings. Sending Post-Allowance papers to Technology Center 1600 will only cause delays in matching papers with the case.

For information concerning status of correspondence sent after receipt of the Notice of Allowance, please contact the Correspondence Branch at (703) 305-8027.

Application/Control Number: 10/632,148

Art Unit: 1624

The Notice of Allowance also has an insert containing contact information on other items, including Issue Fees, receipt of formal drawings and the status of the application.
